OBJECTIVE

Seeking a challenging position as a flutter software developer in a company that can utilize my skills and to develop my experience in a challenging in a challenging environment.

WORK HISTORY

January 2023 – Oct 2023
Full-Stack Mobile Developer at **OWG** – Full Time (on-site)

As a Full Stack Mobile Developer at OWG , I was entrusted with the responsibility of architecting and developing mobile applications from inception to execution. My role encompassed a diverse range of tasks, showcasing my proficiency in both front-end and back-end technologies.

➢ **Discountify Application :**

- **Ui/Ux Design And Development:**
  - I spearheaded the design process using Adobe XD, translating concepts into intuitive and visually appealing user interfaces. This involved meticulous attention to detail and a deep understanding of user experience principles.
- **Flutter Development:**
  - Leveraging the Flutter framework, I crafted dynamic and responsive front-end applications. This technology allowed me to build cross-platform solutions with a focus on delivering seamless user experiences.
  - **Technologies and Packages** that I used is (**bloc** as state management **, firebase services** to handle phone authentication and user location , **localization** for handle different languages and **dio** for handling Apis).
- **Back-End Development With Node.Js:**
  - I extended my expertise to the back-end, utilizing Node.js to construct robust and scalable server-side components. This included the implementation of RESTful APIs for efficient data communication.

PERSONAL INFO
Birthday: July 1998
Nationality: Egyptian
Military Status: Completed

EDUCATION
Bachelor of Computers and Information
Fayoum University
2016 – 2020

KEY SKILLS
- PROBLEM SOLVING SKILLS
- TEAMWORK
- FAST LEARNER
- WORKING UNDER PRESSURE
- RESEARCH CAPABILITY
- EXCELLENT COMMUNICATION SKILLS

KNOWLDGE
- DART AND FLUTTER EXPERIENCE
- HAVE AN EXPERIENCE WITH FRONTEND FIELD SUCH AS : HTML ,CSS , JS,SASS AND VUE JS .
- HANDS-ON SQL
- UNDERSTANDING AND IMPLEMENTING STATE MANAGMENTS LIKE

- **Technologies and Packages** that I used is (**express js** to handle routing , **mongo db** as NoSQL database and **JWT** for generating tokens).

➢ **Transit Application :**

- This innovative transit application, built using Flutter for the frontend and Firebase for the backend, revolutionizes the shipment and delivery process. Users can seamlessly initiate shipments, and concurrently, travelers heading to the same destination have the opportunity to upload their trip details.
- The app fosters direct communication between the shipper and traveler through an integrated **chat** feature.
- **Technologies and packages** is (**Bloc** pattern for state management, **MVC** (Model-View-Controller) architecture for structured code organization, **HTTP** for seamless data communication , **Firebase services**, including Cloud Firestore and Storage, for backend functionalities and Incorporated animations to enhance user experience)

November 2022 – December 2022
Flutter Developer – Freelance

- [TADREEB](#)
- It is an educational program that contains videos, lessons, discounts, and teacher profiles
- State management : **GetX**.
- **[K app](#)**
- social communication application such as the WhatsApp program, through which you can communicate with other people by sending text or voice messages, sharing photos and videos, and you can update the status and create a story.
- State management : **Riverpod**.

January 2022 – October 2022
